

My name is Peyton Bainbridge and I am in my fourth year at Michigan Tech pursuing a bachelor's degree in general chemistry with a minor in business. I have worked in the Valenzano research group since April of 2019 on this particular project. I will be finishing my contributions to this project during the Fall 2020 semester. I will be graduating with my degree in the Spring of 2021 and begin my full-time position with Solenis in southern California.
